EQUIPMENT

We recommend you to pay particular attention to the choice of your equipment. It contributes greatly to the success of your stay. Weight is decisive: you always have to evaluate the ratio weight/comfort, to find the best compromise. In a general way, it is

better to pile up several light coats rather than wear one big clothing.

Hiking boots

- Boots for snowshoeing should be warm and waterproof. They should also provide high ankle support. New boots should be worn a couple of times before.
- If your feet tend to get blisters easily, you can apply baby talc on dry feet in the morning before wearing your socks.

Back-pack

- Minimum size 35 L (a back-pack with extra room is better than too small).
- Once everything is packed, make sure there is enough room to fit your picnic lunch.
- Although backpack covers are very convenient in bad weather, we recommend using a very large plastic bag as a pack-liner to protect your personal belongings from getting wet.

Clothing

Underwear : avoid using cotton. Compared to technical synthetic material, it is heavier and it dries slowly. Wool is also getting popular amongst sportswear brands. Synthetic and wool are warmer ; they dry fast, and allow you to pack light.

Carrying weight

Taking enough time to pack is essential, as you are going to carry every item for several days in a row. Avoiding extra weight can easily be done by packing your clothes tightly, placing heavy items at the bottom of the pack, and avoiding empty spaces. As a result weight is better spread throughout your back and weight impression diminished).
