EQUIPMENT

We recommend you to pay particular attention to the choice of your equipment. It contributes greatly to the success of your stay. Weight is decisive: you always have to evaluate the ratio weight/comfort, to find the best compromise. In a general way, it is better to pile up several light coats rather than wear one big clothing.

Hiking boots

- Boots for snowshoeing should be warm and waterproof. They should also provide high ankle support. New boots should be worn a couple of times before.
- If your feet tend to get blisters easily, you can apply baby talc on dry feet in the morning before wearing your socks.

Back-pack

- Minimum size 35 L (a back-pack with extra room is better than too small).
- Once everything is packed, make sure there is enough room to fit your picnic lunch.
- Although backpack covers are very convenient in bad weather, we recommend using a very large plastic bag as a pack-liner to protect your personal belongings from getting wet.

Clothing

Underwear : avoid using cotton. Compared to technical synthetic material, it is heavier and it dries slowly. Wool is also getting popular amongst sportswear brands. Synthetic and wool are warmer ; they dry fast, and allow you to pack light.

Daily needs

- 1 synthetic long-sleeve shirt,

- 1 light polar fleece,
- 1 pair of Goretex pants,
- 1 long synthetic underwear to wear under your trousers,
- 1 a pair of wool socks,
- 1 Goretex jacket,

What you need for the entire trip

- Down jacket or warm polar fleece,
- long underwear
- changes of clothes: (T-shirt, underwear and socks) prefer synthetic to cotton,
- gaiters (recommended if your Goretex pants don't have a boot-skirt).

Accessories

Daily needs

- 1 pair of fleece gloves, 1 pair of mittens, 1 pair of silk gloves,
- 1 warm hat, a scarf or neck warmer,
